

FasTrak® Plus Electrical Metallic Tubing (EMT):

An easy but tough wiring solution

With enhanced ID coating, FasTrak Plus EMT offers exceptional wire-pulling performance. A lightweight, smooth-pull wiring solution, easy to bend, yet tough enough for all locations that comply with the National Electrical Code® (NEC®), including dry, wet, exposed, concealed or hazardous locations.

Also available in 20'

5' lengths — trade sizes ½ and ¾

Accurate circular cross section with uniform wall thickness

Interior surface free from defects injurious to conductors

Lightweight, easy to install

Galvanized OD with additional clear coating

Proprietary ID coating for fast wire-pulling performance

Contains recycled steel

Designed for Quality and Efficiency

At Wheatland Tube, we leverage our experience and the latest technologies to provide a consistent, high-quality product with on-time deliveries. We manufacture FasTrak Plus EMT from mild steel strip in state-of-the-art ERW mills with the industry's leading in-line galvanizing process that applies molten zinc to the outside diameter. A clear coating is then applied to the outside diameter to inhibit rust and reduce storage stains. The inside diameter is sprayed with a proprietary coating for corrosion resistance and easy wire pulling. The product is then inspected visually and with instruments to ensure all meet the product standard specifications. Our complete in-house production capabilities and quality control programs provide consistency in production.

Green and Sustainable

FasTrak Plus EMT contains recycled steel content of various amounts, depending on the steel manufacturing process, and will provide decades of reliable service if properly maintained. Conductors may be easily removed and new conductors or cables inserted. Future circuits may be added in the same conduit, as permitted by the code. At the end of its life, the steel may be fully recycled.

Tested and Certified for Safety

FasTrak Plus EMT is CSA Certified to CSA

C22.2 No. 83.1-07 or UL® Listed to UL-797, depending on the market being supplied. It is manufactured in accordance with ANSI® C80.3, UL-797 and federal specifications WW-C-563. It provides mechanical protection for cables and conductors, reduces electromagnetic field exposure, shields against electromagnetic interference and is recognized as an equipment grounding conductor by NFPA 70: NEC 250.118 (4). Email info@wheatland.com for a copy of Georgia Tech's Grounding and ElectroMagnetic Interference (GEMI) Analysis software.

The Smart Way to RacewaySM

Wheatland Tube's SmartSet™ EMT with built-in set screw coupling is available on 10' and 20' FasTrak Plus EMT. SmartSet is UL Listed and manufactured in accordance with ANSI C80.1. Our SmartSet product can come built into one end of every piece of EMT to save time and money on every job.

PROUDLY UNION
MANUFACTURED IN THE USA

Wheatland products can also be produced from steel that is made and melted in the United States upon request.

About Wheatland Tube Electrical Conduit and Fittings

Wheatland Tube produces a broad spectrum of steel electrical conduit, including intermediate metal conduit (IMC), electrical metallic tubing (EMT) and DuraGuard™ hot-dip galvanized steel rigid metal conduit. We also supply a full line of steel and aluminum elbows and nipples, steel couplings, and rigid aluminum conduit and couplings. Additionally, we now offer SpeedCouple, a factory-installed swivel coupling, and SmartSet™ EMT with integral set screw coupling.
