ColorCoat
Four Layers of Protection Enhanced with Color

Wheatland Tube's ColorCoat offers four layers of protection and is available on all Wheatland fence framework products. The galvanized coating, intermediate conversion coating, clear polymer coating and polyester coating together make ColorCoat attractive, durable and dependable for any fence application.

ColorCoat Colors

Wheatland's 3 mil polyester TGIC powder ColorCoat meets or exceeds the coating requirements of ASTM F1043, Standard Specification for Strength and Protective Coatings on Steel Industrial Chain Link Fence Framework.

ColorCoat dark green, black and brown colors are in compliance with ASTM F934, Standard Specification for Standard Colors for Polymer-Coated Chain Link Fence Materials.
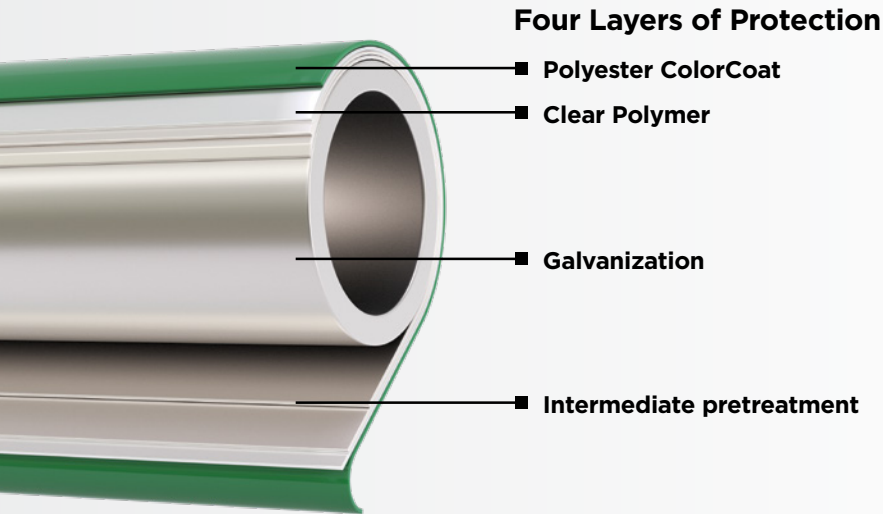

**Available in
3 standard colors:**

Custom colors available, typically matching any RAL color.
