Ref: LEED – Leadership in Energy and Environmental Design

To whom it may concern:

This letter is a follow up to your inquiry concerning the amount of recycled material in Wheatland's pipe and conduit products.

The pipe and conduit products manufactured by Wheatland Tube Company are produced from approximately 25% to 85% recycled steel. The amount can vary depending on the steel vendor. If you must use one number and not a range, use 69%. Of the 69% recycled steel approximately 30% is pre-consumer (or post-industrial) and 70 % is post-consumer depending on fluctuating scrap prices. The American Iron and Steel Institute (AISI) website states: "Steel's recycling rate of 69% is far higher than that of any other material capturing twice as much tonnage as all other materials combined."

Wheatland has manufacturing facilities in the following locations: Wheatland, Pennsylvania; Warren, Ohio; Cambridge, Ohio, Chicago, Illinois, Rochelle, Illinois, and North Kansas City, Missouri.

If I can be of any further assistance, please do not hesitate to contact me.

Sincerely,

Tiffany Dunworth  
Technical Services Manager
