

Pre-galvanized Fence Framework

Tough and Dependable

Wheatland Tube's pre-galvanized fence framework features built-in corrosion defense—both inside and out. It starts with fully galvanized steel coil shipped directly from the producing mill, and our proprietary Ultra Z-Coat™ is applied on the exterior for enhanced protection.

Ultra Z-Coat

Our new, UV light cured coating provides clean, durable protection for all fence applications. Ultra Z-Coat is applied in-line and instantly dried, ensuring optimal adhesion and superior corrosion resistance. There are no solvents, no volatile organic compounds (VOCs) and no hazardous air pollutants (HAPs), making it the most environmentally friendly coating technology.

Ultra Z-Coat is available as a clear coating as well as with standard and custom colors to suit the needs of any environment. The UV curing process results in a smooth, sleek surface for a professional appearance.

The Wheatland Difference

Wheatland Tube's pre-galvanized fence framework is a premium solution for a wide range of applications.

Products

Produced in our Kansas City, Missouri facility, our pre-galvanized line includes residential framework, PG-15, PG-20 and PG-40. PG-40 complies with ASTM F1043, Group IC, requirements.

Applications

Wheatland's pre-galvanized fence framework can be used in a wide variety of residential, commercial, industrial and high-security applications.

Size and Dimension Ranges

PRODUCT	FENCE INDUSTRY OD	DECIMAL EQUIVALENT	WALL THICKNESS	GAUGE	WEIGHT	PIECES LIFT
		in.	in.		lb./ft.	
Residential	1½"	1.315	0.047	18	0.64	91
Residential	1½"	1.315	0.055	17	0.74	91
