

Galvanized Steel Rigid Elbows

Submittal Sheet

Wheatland Tube's galvanized steel rigid elbows are made in America to ensure the ultimate physical protection. Made from the same hot-dip galvanized steel as our rigid metal conduit, our rigid elbows are tough enough for use in outdoor applications, energy and manufacturing plants, and corrosive environments. Standard and special large-radius elbows are available to meet the needs of any project.

Listing

Wheatland Tube's galvanized steel rigid elbows are UL® Listed to UL-6. They are manufactured in accordance with ANSI® C80.1, CSA C22.2 No. 45.1 and federal specification WW-C-581.

Locations

Wheatland Tube's galvanized steel rigid elbows meet the requirements of National Electrical Code® Article 344 for use in indoor and outdoor locations and in wet and dry locations, including Class 1 Division 1 hazardous locations. They may be used for both exposed and concealed installations.

Coatings

Wheatland Tube's galvanized steel rigid elbows are hot-dip galvanized on both the interior and exterior to defend against corrosion. They then receive a passivation coating for extra protection.
