

MOST PVC-COATED RIGID PRODUCTS CONTAIN IMPORTED STEEL

SPECIFY AMERICAN-MADE RIGID STEEL CONDUIT AND ELBOWS, COUPLINGS & NIPPLES

Most producers of PVC-coated conduit use rigid shells or buy finished product from other countries and only coat it in America. Some label the product as “Made in USA,” letting the consumer believe the imported steel is American-made. But when you specify Wheatland Tube’s rigid conduit and elbows, couplings & nipples under the plastic, you’ll know the steel is 100% made and melted in the USA, 100% of the time.
