

LUNCH AND LEARN

About Craig Kohler

Craig Kohler heads up the business development at Wheatland Tube. In this role, Craig leverages his 30+ years of Sales and Marketing experience throughout the distribution channel for steel pipe. He worked for a plumbing supply distributor in the St. Louis area, a national master distributor of steel pipe and 10+ years of steel pipe mill experience.

Wheatland Tube
A ZEKELMAN COMPANY

Available Presentations

Wheatland Tube produces steel pipe using two different processes. The first process is Continuous Weld (CW) and it provides many benefits in terms of easier threading, bending and cutting making it the preference of choice for contractors. Wheatland is the only Continuous Weld mill in the Western Hemisphere and one of the few left in the world. The second process is Electric Resistance Weld (ERW), Wheatland seam anneals the weld zone to attain Grade B which provides a stronger more ductile pipe that is less susceptible to corrosion.

The presentation from Craig Kohler will walk through both the CW and ERW process and discuss the benefits each provides. Additionally, the presentation will cover common sizes, specifications and certifications.
