Ref: American Iron and Steel (AIS) Compliant Products

Dear Valued Customer:

Please let this letter serve as documentation that Wheatland Tube Company's pipe, conduit, conduit ECN (elbows, couplings, and nipples), and ZI Strut channel products produced or supplied by Wheatland Tube Company are produced domestically in the United States of America. These products will meet the AIS requirements of 100% made and melted in the USA, if requested on the purchase order. As of January 2025, Wheatland's steel running thread pipe will also be compliant.

At the time of this writing, the following exceptions exist:
Wheatland's 10" Schedule 10 is manufactured by Atlas Tube (Zekelman Division) in Canada and finished in the USA. Additionally, Speed Couplings and Strut Accessories are supplied by, not produced by, Wheatland Tube. These products will not meet the AIS requirements.

Wheatland Tube Division has manufacturing facilities in the following locations:
Wheatland, Pennsylvania; Warren, Ohio; Cambridge, Ohio; Chicago, Illinois; Rochelle, Illinois; Blytheville, Arkansas and North Kansas City, Missouri.

Please note that Wheatland Tube cannot provide blanket statements certifying melt country of origin. For material that has already been shipped or installed, the heat number, run number, or tag (batch) number will need to be provided in order for Wheatland to verify or certify compliance with AIS requirements. Please note the project name is also required for AIS Certification letters.

If I can be of any further assistance, please do not hesitate to contact me.

Sincerely,

Tiffany Dunworth
Technical Services Manager
