

# Steel EMT

## Submittal Sheet

Wheatland Tube's steel EMT is a lightweight wiring solution tough enough for any environment. Our steel EMT is produced from mild steel strip in our state-of-the-art ERW mills using the industry's leading in-line galvanizing process. It is easy to bend, and the proprietary ID coating allows for faster wire-pulling. Wheatland Tube's steel EMT is available in trade sizes ½-4 in eight vivid colors and 10' and 20' lengths.

### Listing

Wheatland Tube steel EMT is UL® Listed to UL-797. It is manufactured in accordance with ANSI® C80.3 and federal specification WW-C-563, and it complies with CSA C22.2 No. 83.1.

### Locations

Wheatland Tube steel EMT meets the requirements of National Electrical Code® Article 358 for open, concealed and concrete slab installations. It is compatible with all types of building materials.

### Testing

Wheatland Tube performs regular tests of its steel EMT for weld strength, bendability, plating thickness, all dimensions, and uniform smoothness of the interior coating.

### Coatings

Wheatland Tube steel EMT is in-line galvanized to prevent chipping, cracking and peeling, and a secondary clear coating provides further protection against corrosion. A special polymer ID coating protects against corrosion and speeds up wire installation.

### Color

Color EMT from Wheatland Tube is constructed the same way and meets the same requirements as our standard steel EMT, and it is available in red, white, blue, green, yellow, orange, purple and black.
