

Square and Rectangular Tubing

Galvanized Steel Tubing for Ornamental Fencing and Custom Framework Applications

Applications

- Manufactured ornamental panels
- Posts
- Railings
- Gates
- Custom fencing
- General decorative applications

Wheatland tubing is manufactured with the highest-quality steel and forming processes to ensure strength, beauty and construction integrity. Wheatland's galvanized square and rectangular products are protected with a clear polymer coating that provides excellent adhesion properties for most paint and powder coatings. Painting or powder coating over Wheatland's galvanized steel tubing provides greater corrosion resistance and enhanced aesthetics.

Wheatland's square sections are manufactured in accordance with ASTM F2589, with zinc conforming to the ASTM B6 standards for special high-grade zinc. All shapes receive a triple exterior coating that consists of a zinc coating, intermediate pretreatment and clear coat. The interior is protected with a zinc-rich coating.

Wheatland Galvanization: Advanced Coatings Technology

Our in-line galvanizing process offers superior flexibility and quality when compared to the competitor's product made from pre-galvanized coil or post-hot-dipped galvanized tube.

Triple-layer Protection

Our triple-coat process starts with a high-grade 99.99% pure zinc coating. An intermediate pretreatment is then applied to reduce white rust, followed by a polymer top coat that seals the surface and provides a synergistic effect to the corrosion protection well beyond the zinc coating alone. This process protects the zinc that is covering the steel tube—resulting in significantly increased service life.

Our polymer third coat not only protects the underlying zinc; it also accepts most other top coats, which means your tubing comes pre-primed for additional surface coatings that you may wish to add. Whether painting or powder coating, your tube is ready to process with only minimal surface preparation.

SQUARE AND RECTANGULAR TUBING

SHAPE	SIZE	GAUGE	PIECES/BUNDLE	LENGTH
Square	0.750"	18	180	24'
Square	0.750"	16	180	24'
Square	1.00"	16	180	24'
Square	1.25"	16	144	24'
Square	1.50"	16	81	24'
Square	2.00"	16	25	24'
Square	2.00"	14	25	24'
Square	2.50"	14	25	24'
Square	2.50"	12	25	24'
Square	3.00"	14	25	24'
Square	3.00"	11	25	24'
Square	4.00"	13	16	24'
Square	4.00"	11	16	24'

Rectangular sizes from 0.75" x 1.5" through 2" x 4" are available. Contact us for stock availability on these and special sizes and lengths.

Other sizes are available upon request. If you require larger sizes, heavy wall or hollow structural sections, visit our sister company, Atlas Tube (atlastube.com).

Specifications, illustrated material and descriptions are accurate as known at time of publication and are subject to change without notice.

All tubular products are produced in accordance with ASTM A513 and ASTM A500. In-line galvanized coatings are produced in accordance with ASTM 1057.
