

Beauty that's more
than surface deep.

WHEATLAND PREMIUM PVC FENCE

Long-lasting elegance | Shatter-resistant durability
Premium vinyl throughout | American-made excellence

Better performance in all the ways that matter.

Built for the ways families live.

Not all fencing is created equal. Other PVC options are often made with brittle recycled substrates. Wheatland Tube Premium PVC Fence is produced with impact modifiers integrated into a window grade vinyl formulation, making it virtually shatterproof. Materials and the manufacturing process make a huge difference, and you get what you pay for.

Wheatland PVC Fence is solid throughout.

Ordinary fencing with a thin cap over a vulnerable inner layer can quickly show signs of wear. Not so with Wheatland PVC. Its uniform composition is designed to withstand fading and cracking over time.

Color stays true all the way through.

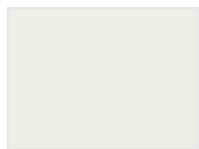

Unlike some other PVC fencing, Wheatland PVC Fence is mono-extruded from virgin vinyl with no unknown fillers, so color is uniform from surface to core. Even deep scratches can't reveal a different colored core, and the high-quality vinyl blend is designed to resist fading.

Better materials made to last.

There's no risk of yellowing, brittleness or weakening thanks to Wheatland's window grade uPVC compounds. Our unique blend starts with high-quality virgin vinyl PVC resin, then layers in a balanced package of lubricants, heat stabilizers, impact modifiers, titanium dioxide (TiO₂) and color pigments. Our fence is designed to survive decades of structural load, weathering and UV exposure.

American-made quality from surface to core.

Wheatland Tube is a Zekelman company and a 100% domestic manufacturer producing the widest range of fence framework products in the industry. All Wheatland PVC Fence products are proudly made in the U.S.A. From the materials used to make our products to the company apparel our teammates wear, we always source as much as possible from domestic suppliers.

Every cut line, every routed edge, every machined surface of Wheatland PVC Fence reveals the exact same material that forms the weather-exposed exterior. There is no hidden layer of inferior PVC beneath the surface. Our fencing offers greater structural integrity and better UV endurance for excellent long-term aesthetics.
